PROFILE

Hello! My name is Elizabet and I'm a UX/UI developer. I'm friendly and eager to work and learn with others. Each position I have held has broadened my skillset and career goals towards forward-thinking technology. I am obsessed with expanding my craft, solving challenging problems and staying on the bleeding edge. I have a passion for creating, and discovering, new and effective digital experiences.

EXPERIENCE

Sysnet Global Solutions

AUG 2015 – PRESENT

Skills

AngularJS, MySQL, Ionic, LESS, SASS, Sketch App, D3, Bootstrap, GIT, Agile (scrum)

UX/UI developer

Sysnet Global Solutions provides payment card industry, cyber security and compliance solutions that help businesses to improve security and acquiring organisations to reduce risk.

I've been working as part of the product team where I created fully-interactive, high-fidelity prototypes with AngularJS. I also created a mobile application with Ionic as a proof-of-concept and data visualisation with D3.

As part of a scrum team, I've been creating user interface designs and doing front-end tasks with AngularJS, HTML and LESS.

NOS SGPS

Jan 2015 – Aug 2015

Skills

AngularJS, Sketch App, JQuery, Bootstrap, SASS, GIT

UX Designer & Front-end Developer

NOS is a Portuguese media company whose main assets include a satellite, cable operator, and ISP, a mobile phone operator, a movie distributor and a virtual carrier of mobile phone services.

I was a key member of the UX team where I created the user interface design and high and low fidelity mock-ups for different projects for mobile and web. I designed and coded the front-end interface for the new self-care product.

Rifl Media LLC

Nov 2013 – Jul 2014

Skills

jQuery, Photoshop, Grails, GIT, LESS

Front-end Developer

Rifl Media is a US based company that created Take It To, a platform that allows users to showcase their art, as well as collect original content to share with other users on the web.

While working with this company in Lisbon, I was creating fully-interactive high-fidelity prototypes and proof of concepts.

I've been working closely with the design team to ensure the platform was extremely user-friendly and satisfied both the needs of our users, as well as those of our stakeholders.

Cooltribes

Jun 2013 – Nov 2013

Skills

jQuery, Photoshop, Grails,
GIT, LESS, MySQL,
Wordpress

Front-end Developer

Cooltribes is a digital agency with offices in Switzerland, Dubai, Lisbon and Venezuela. I worked on several projects for this company during my time as a front-end developer. The majority of my time was spent working on improving the front-end, encompassing HTML, CSS and Wordpress.

Mix&Blend

Jul 2012 – Apr 2013

Skills

jQuery, Photoshop, Grails,
GIT, PHP, Codeigniter,
MySQL, Wordpress

Web Developer

Mix&Blend is a Portuguese web agency. I was working as a web developer crafting web sites with PHP/Codeigniter and Wordpress. This role also required me to effectively manage my time with other smaller tasks, such as front-end tasks specifically for customers and researching new technologies in web design to ensure that our company was pushing the limit and attracting new customers.

2015

Workshop Get started with Angular JS

VOLUNTEERING

Dublin UX

Dublin UX is a meetup group for UX & UI designers and developers, as well as those interested in strengthening their user experience knowledge. It's a friendly and professional network of UXers who want to discuss new ideas and research, share projects, learn new skills and meet other designers and developers.

I have been a volunteer since November 2015, helping with the event organization.

PROJECTS

Cassette Tape Google Chrome Experiment

I created this project to explore new web technologies. This project is showcased on Google Chrome Experiment page. I also presented a demo on Google I/O Dublin 2016.

<https://www.chromeexperiments.com/experiment/cassette-tape>

HOBBIES

I play guitar and produce music during my free time. Taking my time to perfect how something sounds, as well as having pride in the outcome really excites me. I love photography and I really enjoy travelling. I also like to play with new ideas and technologies. This has led me to help with some crowdfunding projects. My latest investment was for Mondo, a digital bank that is seen by many as pushing the banking industry in a new direction.
